

IMPROVING

K-12

**LEARNING
OUTCOMES**

with

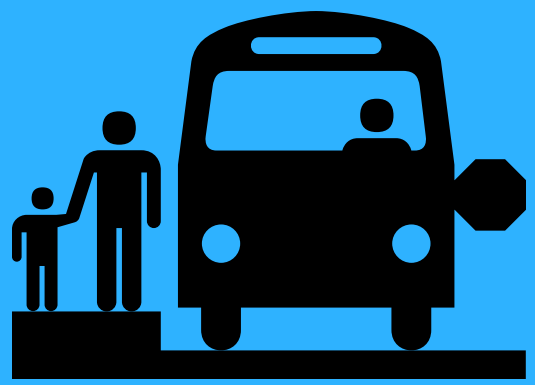

**HP Education
Solutions**

Today's generation of children are digital natives, having been exposed to technology at a very early age. This is resulting in new pressures and trends in educational programs, pushing technology to the forefront of the education system.

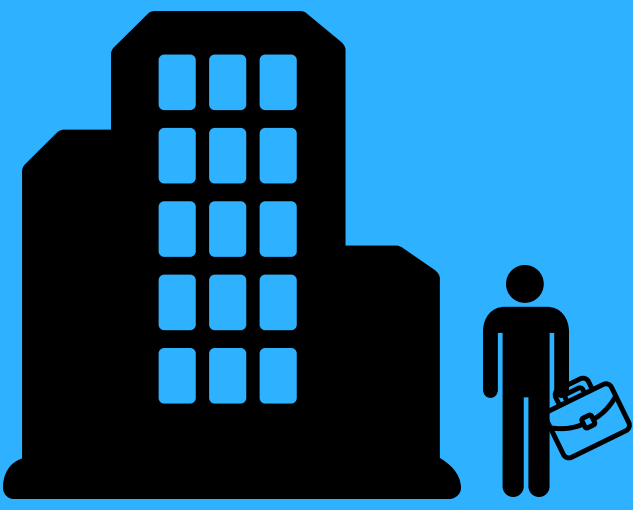

Primary education systems are under intense pressure from parents

56% of parents of school-aged children are concerned about their child not learning the right skills in school to be successful.

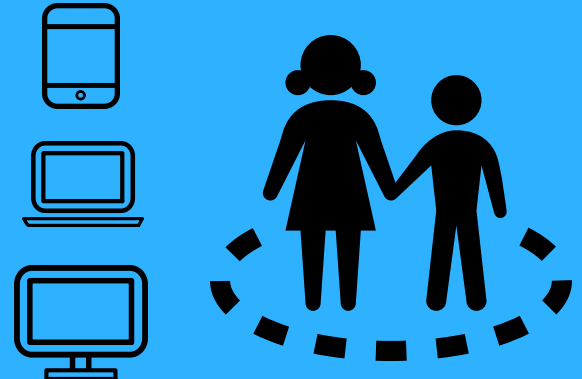

Parents rate the top skills needed for their K-12 children to be successful in a future job or college:

- 86%: *Critical thinking & problem solving*
- 75%: *Creativity*
- 74%: *Understanding how to work across different cultures*
- 74%: *Teamwork & collaboration*
- 70%: *Connectivity -- using technology*

Parents view technology in the classroom as necessary

67% of parents say the use of technology in the classroom provides a significant way for their child to develop these necessary skills.

Teachers & principals agree with parents that mobile learning in the classroom offers enormous benefits:

- 72%: *Provides way for students to review materials anytime*
- 58%: *Extends learning beyond the school day*
- 58%: *Increases student engagement with class material*
- 55%: *Personalizes learning, helping educators move past rigid curriculum*
- 51%: *Improves school-to-home communications*

MEETING THE NEED

HP ProBook x360 11 Education Edition
designed specifically for K-12 environments

Dual Cameras:
Allow students to capture & share experiences inside & outside the classroom

Rugged:
Designed to pass MIL-STD 810G testing, so schools can be confident they will withstand drops & falls

Versatile Convertible Design:
Students can create content, collaborate, & present in a range of models

Thin & Light:
Easily slips into backpacks and carried to and from school

Pen & Touch Experience:
Enables students to naturally annotate, draw, solve, & take notes

School Pack Software:
Fosters students collaboration, innovation, & engagement while teachers monitor students' progress and activities while online

Your Partner in Education

Zunesis is one of the largest enterprise infrastructure VARs in the Rocky Mountain Region and Southwestern United States. We strive to be a trusted advisor where our focus is always on the needs of our clients, not our solutions.

As an HP Gold Partner, we are deeply invested in HP technical certifications and work with our corporate and education clients at a strategic level to understand their business issues before recommending a solution.
