

## WHY HPE SimpliVity

For IT leaders struggling to achieve the agility and economics of the cloud, with the control and governance of on-premises IT, HPE SimpliVity 380 delivers a powerhouse hyperconverged solution and runs on some of the world's most effective and resilient data centers. A market and customer satisfaction leader, the solution dramatically simplifies IT by combining all infrastructure and advanced data services for virtualized workloads onto the bestselling server platform in the market..

HPE SimpliVity's enabling technology, along with the OmniStack Data Virtualization Platform, delivers three breakthrough innovations:

- **Guaranteed data efficiency:** Only HPE SimpliVity hyperconverged infrastructure deduplicates, compresses, and helps optimize all data globally, improving performance, guaranteeing 90% capacity savings across storage and backup.
- **Built-in resiliency and data protection:** Only HPE SimpliVity delivers a resilient hyperconverged infrastructure platform, including built-in backup and replication that helps eliminate the use of legacy solutions.
- **Global VM-centric management and mobility:** Only HPE SimpliVity delivers policy-based, VM-centric management to simplify day-to-day operations and enable data mobility, increasing productivity.

### HPE SimpliVity | HyperGuarantee

- **HyperEfficient:** Achieve 90% capacity savings across storage and backup combined, relative to comparable traditional solutions.
- **HyperProtected:** It will take less than one minute, on average, to complete a local backup or local restore of a 1 TB VM.
- **HyperSimple:** You only need three clicks to back up, restore, move or clone a VM, all from a single console.
- **HyperManageable:** In less than a minute on average, you will be able to create or update backup policies for 1000s of VMs across dozen of sites.
- **HyperAvailable:** You will be available to add or replace HPE SimpliVity hyperconverged systems: without any downtime for local or remote sites, without any disruption to local or remote HPE SimpliVity backups, without any reconfiguration of HPE SimpliVity and backup policies for local or remote sites and without the need to reenter any IP addresses in remote sites.

## MOVING AT THE SPEED OF TRUST

## WHY Zunesis to support HPE SimpliVity

With the goal of minimizing any disruption, Zunesis integrates into our customer's network teams, working seamlessly with the engineering teams to test and validate the targeted applications on the SimpliVity system. Working with HPE, Zunesis also provides lifecycle support for systems, ensuring that customers have priority access to newly released, validated cartridges, ensuring complete integrity with our customers support channels. The Zunesis sales and engineering team are trained in the design and implementation of the SimpliVity platform.

## WHY Zunesis as an HPE Partner

Zunesis has maintained the highest possible Partnership Level with HPE for 12+ years: **PLATINUM**. As one of the largest HPE IT Solution Providers in the Rocky Mountain / Southwest, Zunesis has extensive experience and expertise in all major enterprise infrastructure solutions offered by HPE including:

- SimpliVity HyperConverged
- Synergy, Blade & Rackmount Servers
- MoonShot Servers
- OneView management
- Enterprise Storage (3Par, StoreVirtual, Nimble)
- Enterprise SAN Fabric (Brocade, QLogic, Cisco)
- Data Center Interconnects (Virtual Connect)
- Aruba networking (Switching, wireless, security and management)

Zunesis also boasts robust practices around Microsoft products, virtualization (VMware) and VEEAM.
